Followers of Don Carlos Are Said to Be Uneasily Awaiting Young King's Coming of Age- Don Jaime, Son of Carlos, Believed to Have Virtually Accepted Leadership of Military Element in Present Agitation.

Paris, March 15.—The probability of another Carlist uprising in Catalonia, Spain, this spring, consequent upon the corning of age of the young King Alfonso, attracts rehand not shown an invincible reluctance to take arms against his lord and sovereign.

The Carlists militant and the Carlists in The Carlists of the majority of the carlists of the property of the pr age of the young King Alfonso, attracts renewed attention to the history of that movement, which has disturbed the political welfare of the country of dons ever since before the armies of Napoleon had been driven out of the country. There were already men who said that the expaision of the French was not enough. They insisted also upon the expaision of the Afrancesados, the Frenchified Spaniards, by which name was meant all who were known, or even suspected, if being touched by "Liberalism." The conflict began with the reign of Ferdinand VII, whose whole rulership it entirely filled. The theorists of the party maintain that the descent of the crown in Spain was to heirs-male only, and that Ferdinand had no authority to set aside his brother, the first Don Carlos, in favor of his daughter, Isabei II, grandmodher of the proposent fovereign. Their second contention is that in disjuted causes the Cortes decided.

Formulation of Cause.

Formulation of Cause.

Foundation of Cause.

Standing upon no clear legal right, the only foundation of the Carrists' cause is the ambitions of the male line of the Spandsh Bourbons, to which the passions, the feors, the faults, the virtues, the local patriotisms and the fanaticisms of certain portions of the Spanish peoples have given vinding. The Carlists have conducted the light of the side of resistance according validity. The Carlists have coaduated the light on the side of resistance, opposing everything in politics, religion as irrengion, when first produced the French revolution, and then by means of it recast hil Europe. It is this clash of principles which alone gives some measure of interest—and intelligibility—to a long, brainless and always sanguinary struggle.

From the Agraviados, who organized a go-called war, which bianed up in the mountains of Catalonia in 1871, deixended the Carlists. The Agraviados, or aggrieved persons, were in fact the extreme churchmen and their lay supporters, who jhought the King too lentent to "Free Missons" and such like. They had for their inotito, "Religion, King and inquisition," made for chief the Trappist, who again had for his fierria a lady of mixed Spanish and firles hood, named Josefina Comerford, The Agraviados were partly suppressed, but from them came the Carlists.

though it has helped them to many suc-cesses, has proved their ruin. The same thing was working on the other side; but there, at any rate, it was found in combithere, at any rate, it was found in commimation with some machinery of the Government.

Things move, even in Spain, and neither
the Carlist resources nor the Carlist cause
are what they were in 1831-1840. Then the
Serviles, Apostolices, Agraviados of Ferdinand's reign were relatively more numerous, and were unbroken. Therefore, they
were able to make head against a Government which had no other enemy, and could
use the services of some \$0.000 or \$0.000 wellappointed troops. The second Carlist dising,
in the modile of Queen Isabel's reign, was
a much smaller businers, and ended in complete surrender. It is chiefly worth noting
because the uncle of the present Don Carlos, who was taken prisener, saved himself
from the fate of his Generals, who were
shot, by renouncing his rights. nation with some machinery of the Govern-

organized by the resignation of Don Ama-dee in 1873, and the establishment of the Anarchical Republic. Then the way was cleared for them by the utter cellapse of the Government. The Republicans had promised to abolish the conscription, and one of the first results of their insane en-gagement was to cause the multys and disone of the first results of their insane en-ragement was to cause the muliny and dis-solution of the Army of Causlonia. The solders took the politicians at their word, disbanded and went home. Then came the "cantenalist" outbreak—which was a mere explosion of anarchy by agitators who took the communes of Paris for their model. During this period they never succeeded in occupying any considerable town, and were forced to raise the siege of Dilbao.

A year has passed since we occupied our present premises. We have gained many new friends and retained the good will, also the trade, of our hosts of old ones, and, thanks to their generous support, have lately wound up the most successful business year in our career. But we are nothing if not progressive, and have laid our plans to eclipse all past records. Note our persuasive of ferings for Monday.
